

Practice Physical Distancing For Our Community

← 6 ft = 1.8 m = 1.07 smoots \cong 2 arm lengths →

92%

of graduate students
living in campus housing

practice physical distancing
to avoid close contact
with others*

* Data from April-May 2020 Housing Experience Survey.
Respondents reported practicing physical distancing always or
most of the time in the past two weeks.

The Centers for Disease Control and Prevention recommends staying at least 6 ft (2m) away from others to slow the spread of COVID-19. *Why?*

- The virus spreads mainly between people who are in close contact with one another through respiratory droplets produced when an infected person coughs, sneezes, or talks.
- These droplets can land in the mouths or noses of those nearby or can be inhaled into the lungs.
- COVID-19 can spread by people who are not showing symptoms.

4 Our Community

Wash or Sanitize Your Hands. Wear a Face Covering.

Practice Physical Distancing. Take Care of Yourself and Others.
