Please note that because the selection process is live, your browser will need to be refreshed to show any changes to unit availability.

The room number sequencing follows the typical residential floor layout posted to the Graduate Tower at Site 4 webpage. As such, Room #0741 (on the seventh floor) would be the same type of unit and situated in the same area of the building as Room #2741 (on the twenty-seventh floor). The gray spaces on the floor plan indicate utility closets.

Two minor variations:

- The sixth floor layout is slightly adjusted to accommodate an ADA-accessible housing unit, as well as the Head of House apartment.
- One-bedroom room numbers ending in 27 and 29 alternate between even and odd floors due to the different numbering of utility closets on the floors. While the numbers may be slightly different, the positioning of the room and the unit type are the same for all floors.
